Golan Sofer

Cooking
Tel Aviv District, Israel

Experience

MAVE Security
Head of Platform
January 2025 - April 2026 (1 year 4 months)
Tel Aviv District, Israel

Employee #1. Built the company's product execution pipeline from ideation to production. Built the platform from scratch and defined the architecture, standards, and practices behind it. Work directly with product and design on the technical decisions that shape how we ship.

8fig
Frontend Architect
July 2023 - January 2025 (1 year 7 months)
Tel Aviv District, Israel

End-to-end ownership of critical systems. Built the company's design system from scratch and led complex features from ambiguous ideas to production. Re-architected the back office platform used by support and risk teams. Led a full rebuild of the main dashboard, replacing the legacy implementation and cutting load times from 8+ seconds to near instant. Set quality standards for the frontend team, mentored engineers, and designed the company's engineering interview pipeline.

Riverside.fm
Group Tech Lead
May 2022 - April 2023 (1 year)
Tel Aviv District, Israel

Joined as the sole engineer on the editor team and took ownership of a neglected, non-functional product. Made the call to deprecate the existing implementation and rebuilt the editor from scratch to give it a foundation worth scaling on.

After the rebuild, partnered with management on the product roadmap and long-term vision. Identified breakdowns in cross department communication and designed the workflow that fixed it: feature definition, delivery, and stakeholder approval across product, engineering, and leadership.

Built the engineering interview process for the group and acted as technical and execution lead as the product scaled from ~100 users to nearly 1M.

StreamElements

Senior Frontend Developer

October 2019 - May 2022 (2 years 8 months)

Tel Aviv Area, Israel

Built multiple products from scratch and rode rapid pivots as market conditions and business priorities shifted.

During COVID-19, remained as the sole engineer in the department following a major downsizing, and took ownership of critical initiatives during a high pressure period. The products developed in this phase became foundational to the company's subsequent growth.

Built the product capabilities that later drove significant scale and culminated in the company's \$100M investment from SoftBank.

TGS

Frontend Developer

May 2018 - October 2019 (1 year 6 months)

Israel

Frontend engineer on a high traffic travel booking engine used by major airline customers, including EasyJet and Singapore Airlines.

Designed and built a white label frontend architecture serving multiple enterprise clients from a single platform. Led the design and implementation of cross payment flows across markets.

Amdocs

Mentorship Program - Software Developer Mentee

February 2017 - February 2018 (1 year 1 month)

Israel

Mentored by Software Architect Lior Lew & General Manager Yael Shaham
